## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 64-79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kara et al.(6,233,568) in view of Thiel (6,699,258).

4. With respect to Claim 64, 68-79: Kara discloses the use of a shipping management computer system (see abstract) for:

- a. Receiving a set of package specifications (Figure 8, Box 802);
- b. Determining multiple shipping rates (first and second) for a first carrier (Figure 8, Boxes 807 and 808) ;

Art Unit: 3629

- c. Determining multiple shipping rates (third and fourth) for a second carrier (Figure 8, Boxes 807 and 808) ;
  - d. Receiving a request from a user to ship a package using one of the services by one of the carriers (See Figure 8, Column 5, lines 56-67) ;
  - e. Facilitating the delivery of the package (Column 6, lines 1-6).
5. Kara disclose the use of calculating and displaying rates for specific services, for multiple carriers, but fails to disclose the simultaneous display of rates for each carrier that includes rates of different services (Column 11, lines 1-13). Thiel discloses the use of a system for calculating rates for multiple carriers for multiple services (see abstract), and discloses the computer storing data for the rates of each service for each carrier in one table (Column 11, lines 1-13). Thiel also discloses that the system will walk the user through which service is wanted, however discloses displaying only the final rate for desired service for multiple carriers (Column 11, lines 46-54).
6. Kara and Theil fail to disclose the “simultaneous” display of shipping charges for each service of each carrier. It would have been obvious to one having ordinary skill in the art at the time the invention was made, to display all charges simultaneously. All the rates of each service of each carrier are calculated by Kara and Thiel. Thiel even shows all the rates are stored in one table, however, they all require some sort of selection by the user before each charge is displayed. The way something is displayed, is not considered to be patentable over the prior art of record, therefore it would have been obvious for one of ordinary skill in the art to display all the calculated rates simultaneously for comparison purposes. It should also be noted that the claims are all drawn to system claims, which are limited to the actual systems and their capabilities, and that what information is actually displayed is considered to be printed matter,

Art Unit: 3629

and unless the information is used further in the system, then what is actually displayed is considered non-functional.

7. With respect to Claims 65 and 66: See Figure 8, Box 807.
8. With respect to Claim 67: See Barnett, Figure 9.

***Response to Arguments***

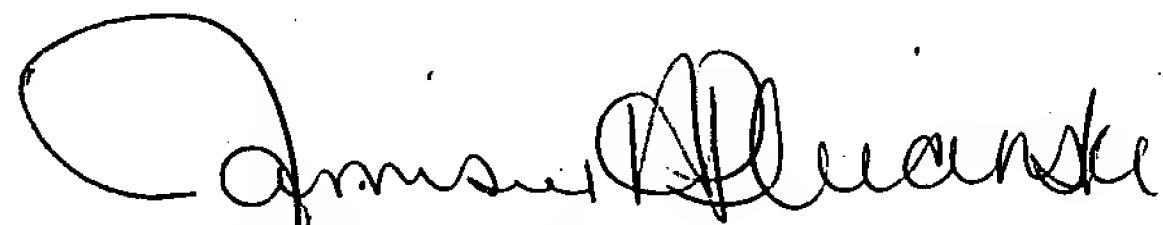

9. Applicant's arguments with respect to claims 64-79 have been considered but are moot in view of the new grounds of rejection.
